

Med Tech South

Concept and Operating Model

Med Tech South (MTS) focuses on the identification, funding and management of select medical device technologies to specific exit points:

- Concentrating primarily on 510(k) medical device technologies
- Secondary focus on implantable devices, orphaned drugs, pharmaceuticals
- Portfolio companies primarily function virtually
- Identification of portfolio opportunities with an investment need of \$2M to \$5M
- Approximately 10 active portfolio companies
- Employ a proprietary source/evaluation methodology to identify and vet opportunities
- Active integration of our extensive network of top-tier medical/scientific contacts and industry leaders to aid in the opportunity selection, development, and exit strategies identification and execution
- Hands on, active management of technology and venture development by deeply experienced professionals (strategy and execution focus)
- Structured development via tightly managed stage-gate process and regular milestone-based evaluations
- Adjacent venture fund
- Targeted exits in 24 to 36 months
